

 **MERLIN**

 **ROXIE** LED

 **ZEP 360LF**

## New comers for 2015!

Code names: MERLIN,  
ROXIE and ZEP 360LF.

For those who have been lucky enough to attend the last trade fairs, Plasa, LDI or JTSE, you certainly had the opportunity to discover the debut appearance of three new unveiled prototypes.

With an output that belies its 2500W HMI lamp and a massive 3-12° beam range, **Merlin** represents a new standard in touring followspots. It covers both long and medium throw ranges in one unit. The reaction from visitors proved this new rugged beast delivers the same impact wherever in London, Las Vegas or Paris.

Of similar dimensions, functions and light output to the RJ Buxie, **Roxie** is the first LED followspot from Robert Juliat, based on a 300W LED engine. Roxie is easy to use and can fit into the smallest of spaces: universities and schools, small theaters, events venues, churches, cabarets or clubs...

The same size and form factor as the Zep 340LF 150W luminaire, the **Zep 360LF** is a new series of 300W LED Fresnel featuring a mighty powerful wash effect and offering a great beam quality.

More detailed information will be shared in the first quarter of the coming year.
