

# ROBERT JULIAT MERLIN

Mixing a stainless steel housing with strong aluminium frames, the Merlin features a revolutionary and rock-solid design, perfect for touring events and rental companies. With an HMI lamp and a 16A power connection, the Merlin followspot combines a power consumption of 2500W and a mighty light output equivalent to a 3000W Xenon source. Ranging from 3 to 12 degree, Merlin is a versatile throw followspot offering the widest choice of ranges in one single unit.
