

**Helios Tube (0.5m)** is an RGB – Amber – Mint LED lighting Tube that has all the features of the popular Titan Tube while offering a smaller format. It allows mounting in areas where a Titan Tube wouldn't fit and also increases portability. This LED lighting Tube has 8 pixels, half the brightness of the Titan tube and just over half its length. Colors and brightness are perfectly matched to those of the Titan Tube`s.

**Titan Tube (1m)** is the ultimate LED tube for filmmakers, TV studios and any creative person. It emits powerful, tunable white with ultra-high color rendering as well as colored light which can be applied to individual pixels or the whole tube. The tube offers unlimited range of usage; indoor or outdoor, AC-powered or on battery, on the go with the AsteraApp, with wired or wireless DMX.

Astera has created the double length **Hyperion Tube (2m)** which measures 2031mm and 79.96 inches. Double the LEDs, double the batteries, double the brightness, double the pixels and the same high-quality light with App, CRMX and on-tube control and wired DMX option.
